

actiCAP slim with snap holders

the next generation in active electrode technology

- ✓ Excellent data quality
- ✓ Live impedance feedback
- ✓ Slim and lightweight design
- ✓ Even more robust
- ✓ Many new applications

Great match for various application fields.

EEG & Brain Stimulation

Slim profile for close coil positioning;
active electrodes for shortest
recovery after artifacts

Baby EEG

Small and lightweight design
maximizes comfort, safety and
allows high electrode density

Sleep

Larger openings allow
paste application for
long-term recordings

mobile EEG

Active electrodes* and low
point of gravity minimizes
motion artifacts

**US patent pending*
