FUNCTIONAL NEUROSURGERY

The course Functional Neurosurgery is aimed at neurosurgeons and neurologists with an interest in the basics of movement disorder and epilepsy surgery.

Whether you want to optimize and update your knowledge or begin practicing functional neurosurgery and learn the basics, this course is designed for all learning levels. Experts from the field will share their experience, and hands-on workshops, simulations, and case discussions will allow you to directly apply what you have learned. This course will take place in Emmendingen, Germany, but can also be attended online by those unable to travel.

MEDICAL DIRECTOR

Univ.-Prof. Dr. med. Volker Arnd Coenen

Medical Director, University Hospital Freiburg, Germany
Department of Stereotactic and Functional Neurosurgery
