

BCI

Advanced solutions for BCI applications

- ✓ High data quality
- ✓ Modular hardware portfolio
- ✓ Compatibility with all major BCI frameworks
- ✓ Free technical support

Find out more on
www.bci.plus

Flexible amplifier options

- ✓ Real-time data access in $<1\text{ms}$
- ✓ Portable (8 to 64 channels)
- ✓ Stationary (up to 160 channels)
- ✓ Synchronize with external hardware using TTL pulses
- ✓ Add extraphysiological sensors (ECG, EMG) for hybrid BCI
- ✓ Compatible with fNIRS & fMRI

Electrode options for every recording scenario

- ✓ passive ✓ active ✓ active dry ✓ sponge

Software solutions

- ✓ Compatibility with all major open source BCI software solutions:

- ✓ Use methods in BrainVision Analyzer 2 for offline analyses
- ✓ Raw data access using a TCP/IP connection or LSL
- ✓ Build your own software using our SDK
